SUMMARY

Dedicated and results-driven frontend engineer with a background in graphic design. Armed with a deep understanding of HTML, CSS, and JavaScript and passionate about crafting visually appealing and user-friendly web interfaces. Confident in my ability to contribute positively to any organization.

WORK EXPERIENCE

Frontend Developer
10. 2023 - current

Qualmity GmbH, Berlin

- Engineered scalable and reusable front-end applications using **React.js** and **Next.js**, ensuring high performance and maintainability.
- Seamlessly integrated **REST APIs** to connect applications with backend services and external systems, facilitating smooth data flow and real-time updates..
- Leveraged **Styled Components**, **Bootstrap**, and **Tailwind CSS** to create responsive, aesthetically pleasing, and customizable user interfaces.
- Enhanced application performance through **code optimization**, implementing best practices to ensure efficient load times and a smooth user experience.
- Designed and developed interactive dashboards utilizing client database statistics, providing actionable insights and data visualization.
- Worked closely with backend developers, **UX/UI** designers, and stakeholders to ensure cohesive project delivery and alignment with business objectives.

Frontend Freelancer
03. 2023 - 10.2023

- **AsfaltingLtd** - Corporate website created in **React.js** in order to boost online presence, increase traffic and build further their brand awareness.
- Employed cutting-edge libraries, including **react-router-dom** and **Material-UI**, to deliver an immersive and seamless user experience.

Graphic Designer
10. 2018 - 10. 2022

LemonOne GmbH, Berlin

- Created visual materials and guidelines for internal teams, photographers and translated into static websites using **HTML / CSS**.
- Recruited and managed a team of more than 20 external editors across Europe, Latin America and Asia.
- Ensured the success of the management of sensitive key accounts by coordinating with the Customer success team, through high-end photo manipulation and problem solving.

2D Artist
05. 2018 - 08. 2018

World 3D Games, Netherlands

- Created compelling visuals for PlayStore mobile games, including **model textures, game assets** and **illustrations** in order to create an immersive and visually captivating gaming experience.
- Painted concept art for in-game **characters**, **icons**, or **GUI**, in order to breathe life into the game world and engage players with visually striking and memorable visuals.

Graphic Designer
10. 2011 - 02. 2013

Mining ltd, Sofia

- Created website visual elements such as hero banners, engaging graphics, and intuitive user interfaces
- Designed product catalogues and promotional materials, such as eye-catching banners and flyers to showcase the unique features and benefits of our products.
